RELEVANT PROJECTS

Get-It-Done – ([preview](#), [code](#))

Project management system uses the MERN stack and some other tools (Redux, Socket.io, AWS). It improves teamwork and efficiency by task assigning and progress tracking. With additional functionality, like real-time chat and file storage.

One Piece Encyclopedia – ([preview](#), [code](#))

A guided tour of my favorite anime, built using React and a REST API with Node(Express.js) and MongoDB. Provides information about the story, characters, arcs, and episodes. Also allows for a community to grow and share opinions via comments.

FireStock – ([code](#))

Stock tracking app, Front-end with React, and Back-end with Firebase. Gives stock prices on different scales and currencies with a prediction for future values using AI.
